

CONCEPT

modular counter systems

# CONCEPT 7

**Concept 7** includes the unique decorative brushed stainless steel bracket which adds value to its contemporary design.

The open style of the overrider, in either veneer or glass, reduces any physical barrier and enhances the contact between receptionist and visitor.

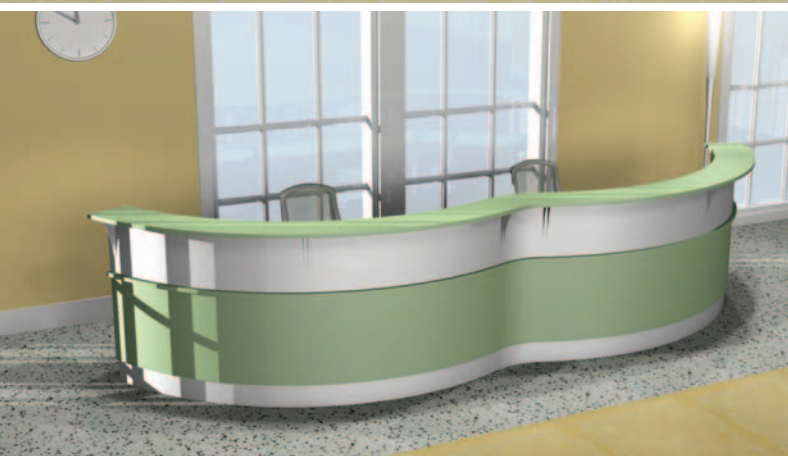

This product is **DDA** compliant

# CONCEPT 8

**Concept 8** bridges the gap between traditional and contemporary designs. The subtle brushed stainless steel bracket provides a compliment of materials allowing it to blend naturally in any environment.

The 'floating' overrider top creates an open style generally not afforded to a modular system.

# CONCEPT 6

**Concept 6** is the proven breadwinner of the range. A popular traditional design providing a solid, quality image.

For added security the top height and depth may be increased to offer the perfect screen for any equipment housed within the desk.

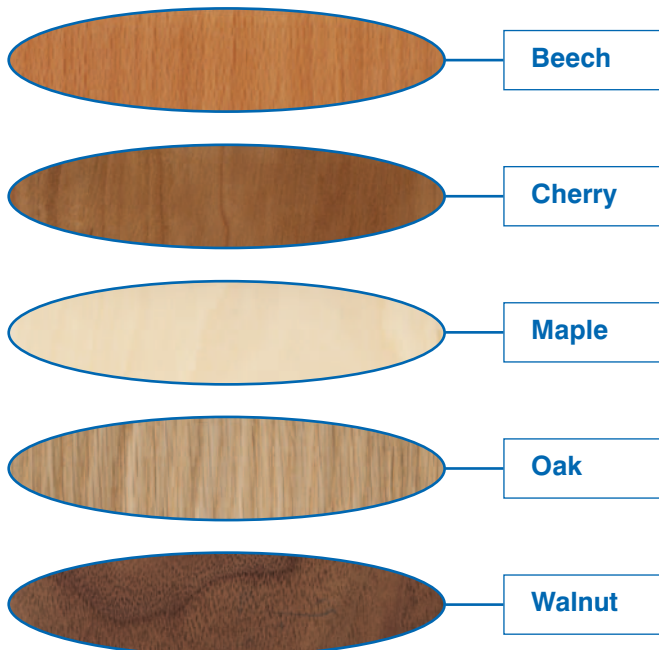

The unique **Concept** range of reception desks offers bespoke values at modular prices. The three options of overrider styles provides flexibility to develop designs to suit any environment.

Overrider tops are available in veneer, laminate, MFC, glass, marble or granite. Veneer tops are supplied with solid wood lipping as standard with all laminate and MFC options including the durable PVC edging.

An extensive range of veneer, laminate or MFC for the main carcass allows a mixture of materials and finishes to provide a lasting impression.

## Finish Options

The **Concept** range incorporates DDA as a feature of design and not as an afterthought. The standard worktop height is 750 mm with recessed modesty panel feature to facilitate wheelchair users.

Accessories include 3 and 4 drawer pedestals in either static or mobile options. Cable trunking and cable outlets in the worktop are available on request. Bulk production allows for shorter lead times and lower prices making **Concept** outstanding value for money.
